

AKSHAY PRASHAR

☎7856832337 | ✉Akshayprashar@outlook.com | [linkedin](#) | [GitHub](#) | [Portfolio](#) | Greater Noida, UP, India

Summary

Developer with hands-on experience building practical tools in computer vision, machine learning, NLP, and WebRTC. Focused on creating useful community-oriented products with clean interfaces, real-time interaction, and deployment-ready Python workflows.

Skills

Programming: Python

Computer Vision: OpenCV, MediaPipe, PyAutoGUI

Machine Learning: XGBoost, Scikit-learn, Pandas, Joblib, Google Colab

AI / NLP: FastAPI, Uvicorn, NLP

Web: HTML, CSS, JavaScript

Streaming / Desktop: WebRTC, aiortc, aiohttp, PyQt5, PyAV

Projects

Gesture Control System | *Python, OpenCV, MediaPipe, PyAutoGUI*

- Built a hands-free control tool that translates real-time webcam hand tracking into cursor movement, clicks, scrolling, dragging, and mode switching.
- Used modular, context-aware profiles for system, Chrome, and VLC interactions with 3D hand landmarks.

IPL Winner & Score Prediction Model | *Python, XGBoost, Pandas, Scikit-learn, Joblib, Google Colab, FastAPI*

- Engineered ball-by-ball contextual features to predict IPL match winner and final innings score from live match state.
- Trained an XGBClassifier and XGBRegressor and prepared the pipeline for FastAPI deployment.

AI-Powered Literature Scout | *Python, FastAPI, Uvicorn, NLP, HTML, CSS, JavaScript*

- Developed a PDF literature summarizer that extracts key points and insights from academic papers for faster review.
- Built a clean user interface for digestible research reading and integrated backend processing for document ingestion.

Wireless Camera Streaming App | *Python, WebRTC, aiortc, aiohttp, PyQt5, PyAV*

- Created a low-latency phone-to-PC camera streaming workflow using a browser-based WebRTC connection over local Wi-Fi.
- Delivered a zero-install desktop viewing experience with a dark-themed PyQt5 interface for live camera usage.

Education

B.Tech. in Artificial Intelligence and Machine Learning | Galgotias College of Engineering and Technology, Dr.

A.P.J. Abdul Kalam Technical University

Final year (2027) | CGPA: 7.0/10

Diploma in Computer Science Engineering | Subharti Institute of Technology and Engineering

Passing year: 2024 | CGPA: 7.0/10

Highlights

- Built 4 end-to-end projects spanning real-time computer vision, machine learning, NLP, and WebRTC.
- Comfortable moving from prototype to a practical, user-facing implementation in Python-based systems.
- Languages: Hindi, English

Objective

To develop tools that help the community.
